

The National Road Operating & Constructing Company Ltd. invites applications for the position of:

SENIOR MANAGER, TECHNICAL SERVICES

The Senior Manager, Technical Services is responsible for the day-to-day management of the core responsibility areas of planning, designing construction and maintenance of the national highways. The incumbent will also participate in planning the strategic direction of the company.

Key Responsibilities include:

- Participating in the design of project proposals and assists the Managing Director in identifying and negotiating sources of funds for implementation.
- Participating in the review of proposals for consultancy services providing technical advice and direction to the process.
- Assisting the Managing Director in preparing cabinet submissions, technical position papers and other technical documents as required.
- Coordinating and monitoring the work of external consultants/advisors and assumes the role of project manager on assigned projects or segments of projects.
- Overseeing and ensuring that appropriate programmes for the monitoring of key elements of the Concession Agreement such as road safety, environmental maintenance and general maintenance and repairs of the highways are undertaken in a timely manner.
- Overseeing the process of ascertaining all regulatory and government approvals for the construction of the highways.
- Working closely with the technical advisors/consultants and ensuring that an effective system is in place to facilitate knowledge transfer on all aspects of the projects to build the internal capacity of the company.
- Leading consultations with stakeholders on the design of highways and ensures that stakeholders' concerns are appropriately considered in reviewing the designs.

Qualification & Experience

- Master's degree in Civil Engineering or related discipline.
- At least ten years' experience in construction or engineering operations.

- At least five years' experience as a senior project leader/manager.
- Experience in managing multiple large-scale projects with responsibility for budget, staffing and resource management.
- Experience in highway or major road network planning, design and/or construction activities.

Your application with a detailed resume should be sent no later than November 8, 2021 to:
